

Separate pass door

NASSAU Economy door

NASSAU Economy door is a good separate pass door solution for buildings, for which there are no specific requirement conc. insulation and air tightness. The door solution is based on NASSAU's pass door profile system and is a durable door for industrial purposes with the possibility of integrating windows and various accessories. By combining the narrow door profile system with NASSAU's well-known foamed section fillings, it is possible to create harmony and architectural interaction with a NASSAU sectional door. The Economy door is as standard supplied with frame and door profiles in alu natural anodized aluminum, and with

powder coated door profile system as an option. The door fillings are as standard supplied with pre-painting outside and inside according to NASSAU standard color program, but these door fillings can of course also be offered in outside and inside wet-painting in RAL-color.

For a natural inflow of light the door fillings can be combined with a fixed-frame window type 90W or alternatively window type 90M with alu profile frame.

20 mm low door step is standard, but as an option a brush sealing can also be offered.

NASSAU Economy door					
	Max. width	Max. height	90F-section ¹	90W windows ²	90M windows ³
Single door	1100 mm	2300 mm	√	√	√
